

## Where Did We Really Come From?

It is perfectly acceptable and even virtuous to think critically about any faith based ideas which are silly, harmful and oppressive.

It is wise (and not disobedient) to refuse to be told what to think. Be your own person and care about what is actually true. Test it. Scrutinize it. Believe what turns out to be reality.

“The amazing thing is that every atom in your body came from a star that exploded. And, the atoms in your left hand probably came from a different star than your right hand. It really is the most poetic thing I know about physics: **You are all stardust.** You couldn't be here if stars hadn't exploded, because the elements - the carbon, nitrogen, oxygen, iron, all the things that matter for evolution weren't created at

the beginning of time. They were created in the nuclear furnaces of stars, and the only way they could get into your body is if those stars were kind enough to explode. So, forget Jesus. The stars died so that you could be here today.”

– Lawrence M. Krauss –  
Scientist, Author, Debater, Public speaker

*Atheism: Because not once has the answer turned out to be magic. Ever.*
